DETAILED ACTION

Applicants' arguments, filed 10/20/03, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are newly applied. They constitute the complete set presently being applied to the instant application.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4, 7-11, 14, 16, 17, 19-26, 29, 30, and 33-36 are rejected under 35 U.S.C. 102(e)(2) as being clearly anticipated by Olesen et al. (P/N 6,063,260).

Olesen et al. summarizes the practice of an autosampler for sample testing of the electrophysiological type in the abstract which is the subject matter of the instant claims. The reference depicts a movable applicator for test material introduction into a plurality of recording stations in Figures 1 - 4. The automation limitations as instantly claimed are clearly set forth in the reference in column 3, lines 15-21. The movability of the applicator in the reference, as also instantly claimed, is set forth in the reference in column 8, lines 10-54. The control flexibility of various testing steps as in instant claim 8

Art Unit: 1631

is described in the reference in column 10, lines 40-53. This rejection is necessitated by amendments to the instant claims.

INFORMATION DISCLOSURE STATEMENT

Two citations are lined through on the enclosed PTO Forms 1449 due to lacking a date of publication as required for such citation types.

CLAIM OBJECTIONS

Claims 2, 3, 12, 13, 18, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the Central PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)).
